2017 Fall Storage and Handling Programs

Corn:

- Drying charges are $.02/half point of moisture.
- Corn shrink will be 1.5% per point of moisture determined by the 10th.
- Cash and Contracted corn shrink and moisture charges are to 15.0% moisture.
- Stored, DP, and Grain Bank corn shrink and moisture charges are to 14.0% moisture.
- Storage charges are 5 cents/month prorated daily. You will be allowed 10 days free to decide.

Soybeans:

Storage Option #1

- $.05/month with ½% shrink applied, prorated charges with no expiration. Storage deductions will be taken out of settlement unless specified otherwise.

Storage Option #2

- $.30 flat fee with ½% shrink applied. This program will expire July 31th 2018. Meaning, bushels will need to be sold by that date or sooner via cash or basis. This storage program will be billed out after harvest and expected to be paid by statement due date unless otherwise specified.

*You will be allowed 10 days to decide after which it will revert to $.05/month

Soybean shrink starts at 13.1% moisture and is 1.5% per ½ point of moisture.

- Example:
  - 13.1 moisture is 1.5% shrink
  - 13.6 moisture is 3.0% shrink
  - 14.1 moisture is 4.5% shrink
  - 14.6 moisture is 6.0% shrink
  - And so on…

Cash and Contract soybeans will NOT receive the ½% shrink like the storage options.

*Please let us know before harvest if you know which storage option you would like to go with so we can set up assemblies ahead of time.

*All programs are subject to change based on space and product availability.
